Summary

Hi, I'm Sathiskumar, a passionate full-stack developer with expertise in both front-end and back-end development. I have a strong foundation in web technologies and a proven track record of building robust and scalable applications. My journey as a developer began with a keen interest in creating visually appealing and user-friendly interfaces. Over the years, I have honed my skills in HTML, CSS, and JavaScript to craft intuitive and responsive web experiences. On the back-end side, I excel in server-side programming and have hands-on experience with popular technologies such as PHP. Working with various databases like MySQL and MongoDB has expanded my knowledge of data modeling and efficient querying. I am a proactive problem solver and constantly stay updated with the latest industry trends and best practices. Besides my technical expertise, I have a strong passion for clean code, maintainable architectures, and continuous learning. I enjoy taking on challenging projects that push my boundaries and allow me to grow as a developer. In my free time, I contribute to open-source projects and participate in hackathons to further enhance my skills.

Please explore my portfolio to see examples of my work and feel free to reach out if you have any inquiries or collaboration opportunities. I'm excited about creating innovative web solutions and contributing to the success of your next project.

Experience

Inthispythonbootcamp I Learnabouttheentirepython languagefully.TheConceptsI Learned inthisbootcamp are basicsofpython,Objectoriented Programming and project oriented learning

Webengineering
Inthiscourse I did learnaboutthefollowing technologies: HTML,CSS,PHP,MYSQL,CI/CD,DOCKER,JavaScript,Code architecture,ProjectArchitectureand API Development

VirtualBusinessCardsusing Augmented reality isanAndroid applicationaswellasweb application.Thisapplicationallows theusertocreateabusinessinadynamic way.Theoutputof businesscard isrendered in3Dview

I develop awebsiteformy collegethatcontainthefollowing features:AttractiveUserInterface,AdminPageand etc...
TechStack:
Frontend:HTML,CSS,JavaScript,Bootstrap
Database:MySQL
Backend:PHP
